JUSTIN SINGH
SOFTWARE DEVELOPER

+ ABOUT

I'm a 28 year old software developer from Toronto, Canada. I'm comfortable in all aspects of software development, and have spent time developing both frontend, and backend code (largely for the web), as well as setting up and managing infrastructure.

Since graduating from university I've taken on a variety of one-off freelance jobs, worked with a corporate client to provide a product order solution to their 600+ franchisees, and spent 2 years at a start-up that developed an interface through which customers could design (and manipulate 3D models of) custom furniture.

I've got a particular affinity for projects that let me combine both design and technology in interesting ways. If you'd like to find out more feel free to get in touch.

+ TOOLS

Pro:
- Django
- Python
- C / C++
- Angular
- SASS
- Java
- Postgresql
- jQuery / Javascript
- ReactJS
- HTML5

Intermediate:
- WebGL
- Flash
- Celery
- Mysql
- ActionScript
- Objective C
- ThreeJS
- RabbitMQ
- redis
- CoffeeScript
- OpenGL
- Rails

Novice:
- Scheme
- Prolog
- Assembly
- Haskell
- Visual Basic

+ EDUCATION

2008 - 2013   **University of Toronto (St. George)**
B.S. (Specialization in Software Development)
Studied computer science, taking particular interest in courses related to artificial intelligence, web programming, and visual computing.

+ EXPERIENCE

2015 - 2017   **Massuni – Online Custom Furniture Start-up**
Jr. Dev. (2015-2016), Lead Dev. (2017)
I developed software that would allow customers to modify the size, style, and functionality of a piece of furniture, and order it. I worked on everything from ecommerce functionality, to WebGL and Flash customization systems.

2012 - Now   **www.justinsingh.ca**
Web Freelance
I worked with companies ranging from local restaurants to small businesses on both web design, and branding.

2012 - 2014   **ACM Printing & Distribution**
Print/Software Technician
I used a Visual Basic proprietary inventory management system to regulate and order supplies. I also developed a website for a large corporate client through which their retailers could order warranty replacement products for customers.

+ HOBBIES & INTERESTS

Drawing   Learning Japanese   Fitness   Playing Videogames
